Main page: Cisco Unified MeetingPlace, Release 7.0

Up one level: Integrating with Microsoft Office Communicator

Restrictions

- You must have Administrator permissions for the Cisco Unified MeetingPlace Web Server.
- You must install the Cisco Unified MeetingPlace LCS Gateway in the same directory in which you install Cisco Unified MeetingPlace web conferencing. (For example, if you install web conferencing in C:\Program Files\Cisco Systems, also install the Cisco Unified MeetingPlace LCS Gateway in the Cisco Systems directory.)

Procedure

1. Log in as an administrator to the Cisco Unified MeetingPlace Web Server.
2. Stop the Cisco Unified MeetingPlace web conferencing services. See Managing Cisco Unified MeetingPlace Web Conferencing Services for information about starting and stopping services.
3. Stop the Cisco Security Agent for Cisco Unified MeetingPlace service, if applicable.
4. Insert the Cisco Unified MeetingPlace LCS Gateway CD into your CD or DVD-ROM drive.
5. Double-click the setup.exe file.
6. Click **Next** on the Welcome screen.
7. Click **Next** on the Choose Destination Location screen.
8. Click **Next** on the Start Copying Files screen.
9. Click **Yes** if the system prompts you to install VS C++ 2005 Redistributable.
   Note: The system does not prompt you to install this if it is already on your system. Instead it displays an informational message.
10. Click **OK**.
    The system briefly displays the command line.
11. Click **OK** to start the installation.
12. Click **Finish** from the installation complete window.
13. Click **OK** when the system reminds you to configure the Cisco Unified MeetingPlace LCS Gateway.
