

## Introduction

Here you can find the configuration of SSO Login into your OWA account when OWA is configured to use form based authentication.

Reference: <https://supportforums.cisco.com/message/3296206#3296206>

## Configuration

All configurations are done via ASDM!

### Exchange 2003:

Configuration -> Remote Access VPN -> Clientless SSL VPN Access -> Portal -> Bookmarks -> Add/Edit your Bookmarks

URL: `https :// <yourhost>/exchweb/bin/auth/owaauth.dll`

Advanced Options: Post

```
destination : https://<yourhost>/exchange/  
flags : 0  
username : <yourdomain>\CSCO_WEBVPN_USERNAME  
password : CSCO_WEBVPN_PASSWORD  
SubmitCreds : Login  
trusted : 0
```

### Exchange 2007:

... same as Exchange 2010 ...

### Exchange 2010:

Configuration -> Remote Access VPN -> Clientless SSL VPN Access -> Portal -> Bookmarks -> Add/Edit your Bookmarks

URL: `https :// <yourhost>/owa/auth/owaauth.dll`

Advanced Options: Post

```
destination : https://<yourhost>/owa/  
flags : 0  
forcedownlevel : 0  
trusted : 0  
username : <yourdomain>\CSCO_WEBVPN_USERNAME  
password : CSCO_WEBVPN_PASSWORD  
SubmitCreds : Login  
isUtf8 : 1
```

For Exchange 2010, in addition a "before-post-script" is required with the following content:

```
cscosetCookie("PBack", "0", "/", "<yourhost>", -1, 0)
```
