

Accept step error during active debug

Problem Summary	While debugging an application, the following message appears, where n is the task ID.
Error Message	<i>Task: nAccept Step: Trigger is not a Contact Application trigger.</i>
Possible Cause	The debugger encountered the Accept step in the application but there was no call to answer.
Recommended Action	Debug the application as a Reactive Application and make the call before the Reactive Application times out.
Release	Release 7.0(1)
Associated CDETS #	None.
