

Accessibility: JAWS Screenreader Shortens Button Names to First Letter

| | |
|---------------------------|--|
| Problem Summary | There is a condition where a JAWS screenreader user is reading a page in the Unified Reporting web interface and the button names begin to be shortened to their first letter. For example, "Create" is read as "C". |
| Error Message | N/A |
| Possible Cause | This is an issue with the accessibility tool. |
| Recommended Action | Shut down the JAWS application; then restart it. |
| Release | Release 8.0(1) |
