

**Add to cluster repeats in a loop**

<b>Problem Summary</b>	At the end of the replication wizard , after viewing the results page if we click F5 (refresh) on the same browser session the pages of the wizard are displayed again
<b>Error Message</b>	Replication Wizard pages (like component and publisher activation ) for the secondary node are displayed in a loop
<b>Possible Cause</b>	Using the same browser session after setup instead of using a new one
<b>Recommended Action</b>	Terminate the existing browser session (instance) and use a new browser session to login using the uccx admin credentials
<b>Release</b>	Release 8.0(1)
<b>Associated CDETS #</b>
