

Add to cluster repeats in a loop

Problem Summary	At the end of the replication wizard , after viewing the results page if we click F5 (refresh) on the same browser session the pages of the wizard are displayed again
Error Message	Replication Wizard pages (like component and publisher activation) for the secondary node are displayed in a loop
Possible Cause	Using the same browser session after setup instead of using a new one
Recommended Action	Terminate the existing browser session (instance) and use a new browser session to login using the uccx admin credentials
Release	Release 8.0(1)
