

Error encountered on file upload

Problem Summary	An error message is displayed when a user attempts to upload a file to the system.
Error Message	Exception report. The server encountered an internal error ()that prevented it from fulfilling this request.
Possible Cause	Media files can only be uploaded one at a time. When two users attempt to upload files simultaneously (each one not knowing that the other is uploading a file), one of the users receives an error.
Recommended Action	Refresh the Media File Management page and wait for the other upload to complete, then restart your upload.
Release	All releases.
Associated CDETS #	None.
