

**Log collection via the CLI fails when using the *compress* flag**

<b>Problem Summary</b>	Log collection via the CLI fails when using the <i>compress</i> flag.
<b>Error Message</b>	None.
<b>Possible Cause</b>	Log collection may fail when you use the <i>compress</i> flag on the CLI command if there are a large number of log files.
<b>Recommended Action</b>	Run the command to collect the log files, using the same CLI command without the <i>compress</i> flag. For example, if you encountered a failure using the command <b>file get active desktop recurs compress</b> , try again with the command <b>file get active desktop recurs</b> .
