# After a macro runs, focus does not return to Agent Desktop

| | |
|---|---|
| **Problem Summary** | After a macro runs, focus remains on the application to which it played. |
| **Error Message** | None. |
| **Possible Cause** | The macro does not include a step to return focus to Agent Desktop (or any other preferred application). |
| **Recommended Action** | Insert this line at the end of the macro:<br><br>[APPLICATION:AGENT_DESKTOP=AGENT_DESKTOP]<br><br>You can also change focus to an application other than Agent Desktop. To determine the string to insert at the end of the macro, create a dummy macro and play a few keystrokes to the desired application. When you finish recording, copy the application?s text identifier from the dummy macro to the macro you wish to edit. |
| **Release** | CAD Unified CCX 8.5 |
| **Associated CDETS #** | None. |
