

After_creating_the_datasource_and_System_DSN,_it_is_not_getting_displayed_in_the_editor_step

After creating the datasource and System DSN, it is not getting displayed in the editor step

Problem Summary	After creating the datasource and System DSN, it is not getting displayed in the editor step.
Error Message	
Possible Cause	The editor has not been refreshed or the download of schema from the Enterprise DB is in progress.
Recommended Action	You need to click on Refresh Schema button from the editor step to download the schema from the external database. After clicking the button it will take some time to download the schema from the enterprise database based on the database size. It will start displaying the datasource after completing the download.
Release	Release 7.0, Release 5.0
