

After the upgrade SQL Server got changed to MSDE

Problem Summary	After the upgrade SQL Server got changed to MSDE. 'db_cra' database size became 2gb.
Error Message	None
Possible Cause	Used non-Cisco provided DVD for SQL Server install. There is a wrapper for the SQL Server installer which updates the CCX specific configurations during installation. If you use non-cisco provided DVD, these configuration changes will not happen during installation and this can result in these types of issues.
Recommended Action	Reimage the box and install OS, CCX and use SQL DVD provided by Cisco for SQL Server installation.
Release	Release 7.0, Release 5.0
Associated CDETS #	None
