

**Agent names overwritten on charts**

<b>Problem Summary</b>	Agent names overwrite each other on charts that appear with the Agent Detail Report, the Agent Login Logout Activity Report, or the Agent Summary Report.
<b>Error Message</b>	None.
<b>Possible Cause</b>	The report contains information for more than 7 to 10 agents.
<b>Recommended Action</b>	Do not include charts with the report if you are generating information for more than 7 to 10 agents approximately, or use filter parameters to limit the report size to accommodate the layout of the information. In some reports this is a natural limitation, for comparing entries of graphics, all entries must display on one single page, thus, one page cannot accommodate a large number of entries.
<b>Release</b>	Release 7.0(1), Release 8.0, Release 8.5
<b>Associated CDETS #</b>	None.
