

Agent names overwritten on charts

Problem Summary	Agent names overwrite each other on charts that appear with the Agent Detail Report, the Agent Login Logout Activity Report, or the Agent Summary Report.
Error Message	None.
Possible Cause	The report contains information for more than 7 to 10 agents.
Recommended Action	Do not include charts with the report if you are generating information for more than 7 to 10 agents approximately, or use filter parameters to limit the report size to accommodate the layout of the information. In some reports this is a natural limitation, for comparing entries of graphics, all entries must display on one single page, thus, one page cannot accommodate a large number of entries.
Release	Release 7.0(1), Release 8.0, Release 8.5
Associated CDETS #	None.
