AppAdmin Authentication Page Opens as a Blank Page

Problem Summary	A blank page opens with an error message instead of the expected AppAdmin authentication page.
Error Message	Peer's certificate has been revoked.
Possible Cause	You are using a custom Tomcat certificate that has now expired instead of the usual Unified CCX self-si certificate.
Recommended Action	There are two workarounds. Workaround 1 NOTE: Cisco does not support this workaround because it could affect the browser when it connects to If you are using a Firefox browser, go to Tools > Options > Encryption. Select the Validation button. Che OCSP server connection fails, treat the connection as invalid." If you are using Internet Explorer, go to Tools > Internet Options > Advanced. Uncheck Server certificat Workaround 2 Regenerate the default Tomcat certificate that comes with Unified CCX and then restart Tomcat service f ``` admin:set cert regen tomcat WARNING: This operation will overwrite any CA signed certificate previously importe Proceed with regeneration (yes/no)? yes Successfully regenerated certificate for Tomcat. You must restart services related to Tomcat for the regenerated certificates to bec ``` Or, get a new certificate from your service provider.
