Application_Extension_Platform_1.x_--_Viewing_the_Application_Environment

To view the application environment, use the show command in Cisco AXP application service EXEC mode or Cisco AXP EXEC mode.

Use the show software version command to view the software versions installed on the service module.

For more information on show command usage, see the *Verifying and Troubleshooting* section in the Cisco AXP User Guide. See <u>Cisco AXP Configuration Guides</u>.
