

Archiver:_Configuration_tool_failed._Exception_occurred_while_executing_a_transact_statement_or_batch

Archiver: Configuration tool failed. Exception occurred while executing a transact statement or batch

Problem Summary	Archiver: Configuration tool failed. Exception occurred while executing a transact statement or batch.
Error Message	WARNING: Exception caught: An exception occurred while executing a Transact-SQL statement or batch. WARNING: Trace: at Microsoft.SqlServer.Management.Common.ServerConnection.ExecuteNonQuery at Microsoft.SqlServer.Management.Common.ServerConnection.ExecuteNonQuery(String script, String address) in n:\blueview\... at CuisConfigTool.Util.SQLUtil.runScript(String script, String address) in n:\blueview\... at CuisConfigTool.Archiver.ArchiverConfiguration.setupCommonData() in n:\blueview\...
Possible Cause	Unified IC CUIS configuration tool must be run as a Windows administrator (mapped also as a sysadmin security login on the local Archiver SQL Server).
Recommended Action	-> Please go through "Archiver Check List" mentioned in Archiver user guide with due diligence before running the tool. -> Check to see if the SQL Server service uses the "local" CuisDBAdmin account prior to running the configuration tool.
Release	Release 7.5(x)
Reference SR #	614841109, 611182195
