

Assure ASR-TTS ports/resources are freed up after the application finishes

Problem Summary	ASR TTS ports/resources are not freed up.
Error Message	MRCP ASR and MRCP TTS resouces not available.
Possible Cause	ASr and TTS resources not available.
Recommended Action	We can make sure only when the Channel Manager calls up the close() method on the MRCP Speech Channel Impl. If this is called then the resources are freed up, else not. Turn on Debugging and Xdebugging Level 1 for SS_MRCP_ASR and SS_MRCP_TTS. Then look for the call to close() in MRCP Speech Channel Impl.
