

Movie Media of Video Micro-Application Cannot be Interrupted

Problem Summary	Note: This tip applies to full video only. Movie media of video micro-app cannot be interrupted by a DTMF barge-in or when the agent becomes available.
Error Message	None.
Possible Cause	This can happen if the micro-application movie media only has an audio-stream and does not have any video stream.
Recommended Action	In the Network VRU script micro-app configuration, change the Show/Display option in the Configuration to A for audio-only.
Release	Release 7.0(2)
Associated CDETS #	None.
