

## Movie Media of Video Micro-Application Cannot be Interrupted

<b>Problem Summary</b>	<b>Note:</b> This tip applies to full video only. Movie media of video micro-app cannot be interrupted by a DTMF barge-in or when the agent becomes available.
<b>Error Message</b>	None.
<b>Possible Cause</b>	This can happen if the micro-application movie media only has an audio-stream and does not have any video stream.
<b>Recommended Action</b>	In the Network VRU script micro-app configuration, change the <b>Show/Display</b> option in the Configuration to <b>A</b> for audio-only.
<b>Release</b>	Release 7.0(2)
<b>Associated CDETS #</b>	None.
