Received ERROR_SCRIPT_NAME = 6 on IVR Service

Problem Summary	The ERROR_SCRIPT_NAME = 6 error code is received on the IVR Service.
Error Message	ERROR_SCRIPT_NAME = 6
Possible Cause	The VRU Script Name data that is passed from the Unified ICME to the IVR Service does not contain the expected components. These components are micro-application name, media file name, and media file type.
Recommended Action	In the Unified ICME Network VRU Script List tool, locate the appropriate script and resolve the configuration error.
Release	Release 7.0(2)
Associated CDETS #	None.
