

Cannot activate Datastore components on HA node

Problem Summary	Cannot activate Datastore components on HA node. Error related DB Edition mismatch during activation of Datastore components.
Error Message	
Possible Cause	HA requires both the nodes to have SQL 2K installed and the SQL 2K should be of same version on both nodes.
Recommended Action	Ensure both nodes have SQL 2K installed. If there is mismatch, open CET->ClusterDependantConfig and edit the DB Edition field.
Release	Release 7.0, Release 5.0
Associated CDETS #	None
