

Charts and Gauges: The Report View is Blank

Problem Summary	You create a chart view for a report, run the report, and select the chart view. The chart is blank.
Error Message	None
Possible Cause	There is no data for the items that you charted.
Recommended Action	Run the grid view for the report, filtering for the data you plan to chart. If the grid view returns no data, then the chart will be blank. The grid view footer shows the records returned.
Release	Release 8.0(1)
Associated CDETS #	None
