

Cisco_IOS_IPv6_Feature_Mapping

This table lists the platform-independent IPv6 features supported in Cisco IOS release trains and provides links to platform-independent IPv6/IPv4 dual-stack Configuration Guide documents and IPv6 Implementation Guides.

Note that the IPv6 Implementation Guide, All Releases, column provides links to IPv6 process module documentation. The feature release columns provide the earliest releases for each software train in which the feature became available, as well as links to the IPv6/IPv4 dual-stack feature documentation where applicable. Unless noted otherwise, subsequent releases of that Cisco software release train also support that feature.

Contents

- [1 IPv6 Features](#)
