Optical Technology is home to Cisco's comprehensive family of WDM and non-WDM optical transport solutions. With its complete TDM, data and storage support, extensive topology (linear, mesh, rings) capability, and integrated element management, the Cisco optical solution portfolio focuses on many key segment categories such as Service Provider, Enterprise, and Cable.

This wiki offers a collaborative environment as part of the overall Cisco Optical Networking documentation suite. Topics will be added and updated on a regular basis. For instructions on editing or adding articles, refer to About DocWiki.
