

[Cisco Unified MeetingPlace, Release 6.x](#) > [Cisco Unified MeetingPlace Audio Server](#) > [Configuring](#) > [Configuring NSF Codes](#)

The NSF code type determines if the NSF is a service or feature. There are four NSF code types, as listed in [Table: NSF Code Types](#).

**Table: NSF Code Types**

| <b>NSF Code Type</b>             | <b>Example</b>                           |
|----------------------------------|--|
| Service                          | Software Defined Network (SDN) by AT&T   |
| Feature                          | Billing Number preferred for ANI by AT&T |
| Service plus modifying parameter | Outwats and Tie Line by Bell Canada      |
| Feature plus modifying parameter | Vari-A-Bill (Flexible Billing) by AT&T   |
