

[Cisco Unified MeetingPlace, Release 6.x](#) > [Cisco Unified MeetingPlace Audio Server](#) > [Configuring](#) > [Configuring NSF Codes](#)

The NSF code value indicates the specific ID of the service or feature. This value ranges from 0 to 31. [Table: Examples of NSF Code Values for Specific NSF Code Types](#) gives some common NSF code types and their corresponding NSF code value.

Table: Examples of NSF Code Values for Specific NSF Code Types

NSF Code Type	NSF Code Value (BFCV)
Software Defined Network (SDN) by AT&T	1
Billing Number preferred for ANI by AT&T	4
Outwats by Bell Canada	3
Vari-A-Bill by AT&T	9

Note: The NSF code value is also called the Binary Facility Coded Value (BFCV).
