

Cisco Unified MeetingPlace, Release 6.x

Custom Search:

Cisco Unified MeetingPlace H.323/SIP IP Gateway works with the Cisco Unified MeetingPlace Audio Server system to provide meeting access to callers. The gateway supports up to 960 IP connections. The Audio Server system supports connections from up to 16 IP gateway servers; this multigateway support provides network load balancing and system redundancy.

NOTE: Use either Cisco Unified MeetingPlace H.323/SIP IP Gateway Release 5.3 or Release 6.0 with Cisco Unified MeetingPlace, Release 6.0. Cisco Unified MeetingPlace H.323/SIP IP Gateway Release 6.0 was released on 15 July 2009 as part of Cisco Unified MeetingPlace Release 6.0 Maintenance Release 5.
