

Main page: [Cisco Unified MeetingPlace, Release 6.x](#)

Custom Search:

NOTES:

- Read the instructions on the [DocWiki Print Page](#) first and then:
 1. Highlight and copy the list of page names that you want to print.
Tip: Click the link in the Table of Contents to go the section you want.
 2. Once you find the list of page names that you want to print, *do not click the page names, just highlight them*. Do not include the group header name.
 3. Do Control-C to copy the list of page names.
 4. Return to the [DocWiki Print Page](#).
- See also [Common Search Groups By Component](#) for common search group by component (Audio Server, Web Conferencing, Outlook integration, etc.)
