

Cisco Unified MeetingPlace, Release 6.x

**Custom Search:**

This document lists requirements and other necessary information for installing Cisco Unified MeetingPlace Release 6.0 components. Each of the following sections contains information for the specific Cisco Unified MeetingPlace component:

## Contents

- [1 Third-Party Software Policy](#)
- [2 Core Components](#)
- [3 Other Components](#)
- [4 Gateways](#)
- [5 Integrations](#)

### Third-Party Software Policy

Cisco Unified MeetingPlace is extensively tested in its supported hardware and software environment. Diverging from the supported hardware and software environment by adding third-party components may negatively impact Cisco Unified MeetingPlace functionality and may impose limitations to your Cisco support.

Cisco qualifies a fixed set of required third-party software, including remote-access and antivirus. This set is documented in the System Requirements document for each release. Any third-party components that are not explicitly listed in the System Requirements documentation are not supported

### Core Components

- [Requirements for Cisco Unified MeetingPlace Audio Server Release 6.0](#)
- [Requirements for Cisco Unified MeetingPlace Web Conferencing Release 6.0](#)
- [Requirements for Cisco Unified MeetingPlace MeetingTime Release 6.0](#)
