

[Cisco Unified MeetingPlace, Release 6.x](#) > [Cisco Unified MeetingPlace Audio Server](#) > [Configuring the Audio Server System](#)

Note: These time zone codes apply to both Cisco Unified MeetingPlace Release 6.x and 7.x.

Use the following time zone codes to show numeric values of time zones when you create files for importing user profile information. There are 319 time zones to accommodate the rules of each country and region. Cisco Unified MeetingPlace supports all these time zones so users do not have to account for time zone differences.

For example, if you have a Cisco Unified MeetingPlace system in New York and users in Chicago and London, each user can interact with the Cisco Unified MeetingPlace system using their local time.
