

[Cisco Unified MeetingPlace, Release 6.x](#) > [Web Conferencing](#) > [Installing and Upgrading](#) >

[Uninstalling Web Conferencing or SQL Server Software](#)

If you are no longer using SQL Server for any other applications, you can uninstall it manually.

Restrictions

Uninstalling SQL Server does not remove the MPWEB SQL database files. To completely remove all database files associated with Cisco Unified MeetingPlace Web Conferencing, you must manually locate and delete the files.

To Remove SQL Server Software

1. From the Windows Start menu, choose **Settings > Control Panel > Administrative Tools > Services** .
2. Stop the **Microsoft SQL Server** service.
3. From the Start menu, choose **Settings > Control Panel > Add/Remove Programs** , then choose **Microsoft SQL Server** .
4. Click **Remove** .
5. Reboot the server.
