

[Cisco Unified MeetingPlace, Release 6.x](#) > [Cisco Unified MeetingPlace Audio Server](#) > [Planning the installation](#) > [Database Planning Worksheets](#)

Three fields in the Reservationless Mtgs action in the System tab allow you to set attributes for reservationless meetings.

Use this worksheet to plan the reservationless meeting fields.

Field	Default	Description	Options	Value
Enable reservationless	No	Allow or prevent reservationless meetings. This field is read-only.	Yes/No	
Owner Initiate with 2 key?	No	When <i>No</i> , meeting owners must enter their profile and password. When <i>Yes</i> , meeting owners start their reservationless meeting by pressing 1 to attend the meeting and then 2 to start the meeting (after which they must enter their password).	Yes/No	
Allow 3rd party initiate?	Yes	Whether profile users can initiate reservationless meetings before the meeting organizer arrives.	Yes/No	
Bill 3rd party initiator?	Yes	Whether the reservationless meeting is billed to the meeting initiator (when a third party initiates the meeting) or the meeting organizer (no matter who initiates the meeting).	Yes/No
