

Main page: [Cisco Unified MeetingPlace, Release 7.0](#)

Up one level: [Reference Information](#)

Use this page to create a certificate and upload it to the Cisco WebEx Site Administration. To find this page, click **System Configuration > Cisco WebEx Configuration > Cisco WebEx Certificate**.

Note: This page was called "WebEx Certificate" in Release 7.0.1.

Table: Field Reference: Cisco WebEx Certificate

Field	Description
Certificate location	Go to this directory to save a local copy of the certificate.
Cisco WebEx Site Administration URL	Use this URL to upload the certificate to the Cisco WebEx Site Administration. If no link appears, then you first need to configure the fields on the Cisco WebEx Site and Server Page .
Create Certificate	Creates a new certificate and saves it to the stated Certificate location . Restriction: If you create a certificate when one is already in place, then you will block further user access to Cisco WebEx through Cisco Unified MeetingPlace. You must upload the new certificate to the Cisco WebEx Site Administration to re-enable user access.
