Main page: Cisco Unified MeetingPlace, Release 7.0

Up one level: Reference Information

You can configure how many times and how frequently the system attempts to resend notifications that have failed.

Note: This configuration also applies to the back-end deployment of Microsoft Outlook integration, which enables Cisco Unified MeetingPlace to send Microsoft Outlook calendar notifications for meetings that are scheduled from the Cisco Unified MeetingPlace end-user web interface.

See one of the following documents, depending on your Cisco Unified MeetingPlace release:

- (Release 7.0.2 and later releases) Enabling Microsoft Outlook Calendar Notifications for Meetings Scheduled from the Cisco Unified MeetingPlace End-User Web Interface

- (Release 7.0.1) Integrating with Microsoft Outlook

Procedure

1. Log in to the Administration Center.
2. Click **System Configuration > E-Mail Notifications > Notification Configuration**.
3. Configure the fields.
4. Click **Save**.
