

**Main page:** [Cisco Unified MeetingPlace, Release 7.0](#)

**Up one level:** [Configuration](#)

This section describes how to configure your Segmented Meeting Access-2 Server (SMA-2S) deployment. It assumes that you have already installed Cisco Unified MeetingPlace Web Conferencing on your internal and external Web Servers.

- [Restrictions for Accessing Meeting Data from an External \(DMZ\) Web Server](#)
- [Prerequisites for Configuring SMA-2S](#)
- [Configuring Redirection of External Meetings](#)
- [How to Test Your SMA-2S Configuration](#)
- [How to Disable SMA](#)
- [How to Enable SMA After an Upgrade](#)
