

Main page: [Cisco Unified MeetingPlace, Release 7.0](#)

Up one level: [Reference Information](#)

To find this Administration Center page, click **System Configuration > Customize Outlook Interface**.

Note: This page appears only when the msft_int license is installed. See [About Licenses](#).

Table: Table 19 Field Reference: Customize Outlook Interface

Field	Definition
Language	Specifies which scheduling form to modify. The system has a separate scheduling form for each language. Recommendation: Use consistent customizations for all languages on your system. Default: Value of the Language 1 field on the Usage Configuration Page .
Field Name	Default field label for scheduling form.
Custom Label	Customized field label for scheduling form.
Enabled	Whether to show (Yes) or hide (No) the field on the scheduling form.
Default Enabled	Default value of the Enabled field.
Save	Saves the settings for the scheduling form specific to the selected Language . Recommendation: Use consistent customizations for all languages on your system by making similar changes for each Language option.
