Up one level: [Integrating with IBM Lotus Sametime Web Conference](#)

The Cisco Unified MeetingPlace for IBM Lotus Sametime Web Conference installer is part of the Cisco Unified MeetingPlace Application Server software. After installing the Cisco Unified MeetingPlace Application Server, download the Cisco Unified MeetingPlace for IBM Lotus Sametime Web Conference installer from the Application Server Administration Center, and run the installer on the IBM Lotus Sametime server.

Before You Begin

- Make sure that you install the IBM Lotus Domino, IBM Lotus Sametime, and Cisco Unified MeetingPlace servers before deploying the IBM Lotus Sametime Web Conference installer.
- If you previously installed Cisco Unified MeetingPlace for IBM Lotus Sametime Web Conference, you must uninstall the current version before installing the new version. See the [Uninstalling Cisco Unified MeetingPlace for IBM Lotus Sametime Web Conference](#).

Procedure

1. Log in to the Cisco Unified MeetingPlace Administration Center from the IBM Lotus Sametime server.
2. Select **System Configuration > Sametime Configuration**.
3. Click **Download Cisco Unified MeetingPlace for IBM Lotus Sametime Web Conference Installer** to download the installer to the IBM Lotus Sametime server.
4. Stop the IBM Lotus Sametime server.
5. Double-click the downloaded Cisco Unified MeetingPlace for IBM Lotus Sametime Web Conference installer on the Sametime server to install it.
6. Click **Run** at the security window, if it appears.
7. Start the IBM Lotus Sametime server.
