

Main page: [Cisco Unified MeetingPlace, Release 7.0](#)

Up one level: [Reference Information](#)

To find this page, click **System Configuration > Web Servers**, and then click one of the entries.

Table: Field Reference: Edit Web Server Page

Field	Description
FQDN	Fully-qualified domain name of the Web Server.
Hostname	<p>Hostname of the Web Server. This may or may not be the same as the FQDN.</p> <p>When Enabled is set to Yes, this text appears in the drop-down menu of links at the top of each Administration Center page.</p> <p>See Changing the Web Server Hostname From an IP Address to a Hostname.</p>
Unit number	<p><i>Display only.</i> Identifies the Web Server associated with this entry. This number matches the "Unit" value on the Gateway SIM tab in the MeetingPlace Gateways Configuration Utility on the Web Server.</p> <p>See Opening the MeetingPlace Gateways Configuration Utility.</p>
Installation key IP address	<p>These fields are required to support a "reverse connection" between the Application Server and the Gateway SIM on the Web Server.</p> <p>Obtain the "Installation Key" and "Local IP Address" values from the Gateway SIM tab in the MeetingPlace Gateways Configuration Utility on the Web Server.</p> <p>See Opening the MeetingPlace Gateways Configuration Utility.</p>
Enabled	<p>Whether to enable the following:</p> <ul style="list-style-type: none"> • Gateway SIM "reverse connection" between the Application Server and the Web Server. • Link to the Web Server from the Administration Center.
