Main page: Cisco Unified MeetingPlace, Release 7.0

Up one level: Reference Information

To find this page, click **System Configuration > Web Servers**, and then click one of the entries.

Table: Field Reference: Edit Web Server Page

Field	Description
FQDN	Fully-qualified domain name of the Web Server.
Hostname	Hostname of the Web Server. This may or may not be the same as the FQDN. When Enabled is set to Yes, this text appears in the drop-down menu of links at the top of each Administration Center page. See Changing the Web Server Hostname From an IP Address to a Hostname.
Unit number	*Display only*. Identifies the Web Server associated with this entry. This number matches the "Unit" value on the Gateway SIM tab in the MeetingPlace Gateways Configuration Utility on the Web Server. See Opening the MeetingPlace Gateways Configuration Utility.
Installation key IP address	These fields are required to support a "reverse connection" between the Application Server and the Gateway SIM on the Web Server. Obtain the "Installation Key" and "Local IP Address" values from the Gateway SIM tab in the MeetingPlace Gateways Configuration Utility on the Web Server. See Opening the MeetingPlace Gateways Configuration Utility.
Enabled	Whether to enable the following: • Gateway SIM "reverse connection" between the Application Server and the Web Server. • Link to the Web Server from the Administration Center.
