

**Main page:** [Cisco Unified MeetingPlace, Release 7.0](#)

**Navigation:** [Integration](#) > [Integrating with Microsoft Outlook](#)

**Note:** This page applies to Cisco Unified MeetingPlace, Release 7.0.2 and later only. For information about this topic for Release 7.0.1, see [Integrating with Microsoft Outlook](#).

This document describes the Microsoft Outlook *back-end* integration, which enables Cisco Unified MeetingPlace to send Microsoft Outlook calendar notifications for meetings that are scheduled from the Cisco Unified MeetingPlace end-user web interface.

This document does *not* describe the Microsoft Outlook *front-end* integration, which enables users to schedule, reschedule, and cancel meetings from the Microsoft Outlook calendar. For information about Microsoft Outlook *front-end* integration, see [Enabling Cisco Unified MeetingPlace Scheduling from Microsoft Outlook](#).

Topics in this section include:

- [Prerequisites for Sending Microsoft Outlook Calendar Notifications for Meetings Scheduled from the End-User Web Interface](#)
- [Restrictions for Sending Microsoft Outlook Calendar Notifications for Meetings Scheduled from the End-User Web Interface](#)
- [How to Enable Cisco Unified MeetingPlace to Send Microsoft Outlook Calendar Notifications for Meetings Scheduled from the End-User Web Interface](#)
