

**Main page:** [Cisco Unified MeetingPlace, Release 7.0](#)

**Up one level:** [Reference Information](#)

Parameter	Description
Allow Profile Access	Determines whether users see the Account link on the Cisco Unified MeetingPlace Web Conferencing home page.  The Account link provides users with access to their profile information.
Allow Admission of External Participants	Determines whether this Web Server allows users with appropriate meeting console permissions to escalate a meeting in progress from the internal Web Server to an external Web Server to allow external participants to join.
Allow Chat In Meeting Console	Determines whether the chat window is available in the meeting console.
Allow Show Moderator Cursors	Determines whether users will see cursors when moderators move their mouse during a meeting.
Allow Public Meetings in Find Meeting List	Determines whether public meetings are listed when users use the Find Meetings search engine.  If you select No, the search engine displays only the meetings scheduled by the searcher or meetings that the searcher has been invited to by profile.  <b>Default Yes.</b>
Allow Guest Access to Find Meetings Page	Determines whether guest users (that is, users who do not have Cisco Unified MeetingPlace profiles) have access to the Find Meetings page.  <b>Note:</b> To make sure that guest users can use the Find Meetings feature, set both the <a href="#">Allow Public Meetings in Find Meeting List</a> and <a href="#">Allow Guest Access to Find Meetings Page</a> parameters to <b>Yes</b> .
Allow Remember Me	Determines whether the Remember Me check box displays on the Cisco Unified MeetingPlace Sign In page.  Remember Me stores user passwords as a cookie for future web conferencing sessions.
Remember Me Expiration Interval (Days)	Specifies the number of days Remember Me is valid. If you enter 0, Remember Me never expires.  <b>Default 90</b>
