

**Main page:** [Cisco Unified MeetingPlace, Release 7.0](#)

**Up one page:** [Installation](#)

Cisco Unified MeetingPlace Web Conferencing supports a Segmented Meeting Access (SMA) configuration that allows you to provide external access to your users while maintaining network security.

- [Preparing to Install Cisco Unified MeetingPlace Web Conferencing with SMA](#)
- [Installing Cisco Unified MeetingPlace Web Conferencing for an SMA Deployment](#)
- [Completing the Cisco Unified MeetingPlace Web Conferencing SMA Installation](#)

**Note:** If you are installing either an internal cluster or external cluster as part of your SMA deployment, see [Installing Cisco Unified MeetingPlace Web Conferencing in a Load-Balancing Configuration](#) and follow the tasks in that section rather than the tasks in this section.
