

**Main page:** [Cisco Unified MeetingPlace, Release 7.0](#)

**Up one level:** [Integration](#)

You can integrate Cisco Unified MeetingPlace with Cisco Unified IP phones so that users can see and manage their meetings on their phones through an application called Cisco Unified MeetingPlace PhoneView. This section describes how to configure the PhoneView service.

- [About Cisco Unified MeetingPlace PhoneView](#)
- [How to Configure Cisco Unified MeetingPlace PhoneView](#)
- [Finding an IP Phone Service in Cisco Unified Communications Manager](#)
- [Deleting an IP Phone Service](#)

**Note:** Cisco Unified MeetingPlace PhoneView is a Cisco Unified Communications Manager feature. However, this section does not describe how to install or configure Cisco Unified Communications Manager (formerly known as Cisco Unified CallManager) for your network. For additional information, see the Cisco Unified Communications Manager documents at [http://www.cisco.com/en/US/products/sw/voicesw/ps556/tsd\\_products\\_support\\_series\\_home.html](http://www.cisco.com/en/US/products/sw/voicesw/ps556/tsd_products_support_series_home.html)

For a list of supported phone models, see [Supported Cisco Unified IP Phones for Cisco Unified MeetingPlace PhoneView](#).
