Up one level: [Integrating with IBM Lotus Sametime Web Conference](#)

You can change the IBM Lotus Sametime server hostname or delete the configuration on the Cisco Unified MeetingPlace Application Server.

Before You Begin

If you are changing the configuration to a new IBM Lotus Sametime server in the Cisco Unified MeetingPlace Administration Center, make sure this new server is up and running so that the connection between the servers will be successful.

Procedure

1. Log in to the Cisco Unified MeetingPlace Administration Center.
2. Select **System Configuration > Sametime Configuration > Sametime Server**.
3. (Optional) Edit the IBM Lotus Sametime server hostname:
 1. Click **Edit**.
 2. Change the hostname.
 3. Click **Save**.
4. (Optional) Delete the IBM Lotus Sametime server configuration:

You do not need to stop the IBM Lotus Sametime server service.

 1. Select the IBM Lotus Sametime server by checking its box.
 2. Click **Delete Selected**.
