You can use audit logs to monitor the activities and commands of users on the Application Server. The **psacct** utility provides audit log functions. It contains four commands: ac, lastcomm, accton, and sa.

Follow these steps to enable a login audit on the Application Server:

Procedure

1. Go to the operating system login page.
2. Log in as the user called **root**.
3. Enter the password associated with this username.
The system displays the operating system desktop.
4. Choose **Application > System Tools > Terminal**.
The system displays the command line.
5. Follow the instructions in the table.

To do the following	Enter this
To enable the psacct utility	chkconfig psacct on
To start the psacct utility	/etc/init.d/psacct start
To display statistics about the connect time for users	\$ ac
To display previously executed user commands	\$ lastcomm <user_id>
To show previous logins	last -a
For more information about a command	man <command_name>
