Up one page: Troubleshooting

You can use audit logs to monitor the activities and commands of users on the Application Server. The **psacct** utility provides audit log functions. It contains four commands: ac, lastcomm, accton, and sa.

Follow these steps to enable a login audit on the Application Server:

Procedure

1. Go to the operating system login page.
2. Log in as the user called **root**.
3. Enter the password associated with this username.
     The system displays the operating system desktop.
4. Choose **Application > System Tools > Terminal**.
     The system displays the command line.
5. Follow the instructions in the table.

To do the following	Enter this
To enable the **psacct** utility	chkconfig psacct on
To start the **psacct** utility	/etc/init.d/psacct start
To display statistics about the connect time for users	$ ac
To display previously executed user commands	$ lastcomm *<user_id>*
To show previous logins	last -a
For more information about a command	man *<command_name>*
