**Table: Export Data Specifications-Scheduling Statistics Information**

Header Field	Description	Size and Type of Value
fNumSchedSuccesses	Number of scheduling operations that were successful.  For example, suppose that a user successfully schedules a recurring meeting with 100 instances from the end-user web interface. This would add 1 to <u>fNumSchedSuccesses</u> and 100 to <u>fNumSchedWeb</u> .	Up to 16 numeric integers
fNumSchedWindows	Number of meetings scheduled from Microsoft Windows computers.	Up to 16 numeric integers
fNumSchedMac	Number of meetings scheduled from Macintosh computers.	Up to 16 numeric integers
fNumSchedNotes	Number of meeting scheduled from IBM Lotus Notes.	Up to 16 numeric integers
fNumSchedVUI	Number of meetings scheduled from the TUI.	Up to 16 numeric integers
fNumSchedWeb	Number of meetings scheduled from the end-user web interface.	Up to 16 numeric integers
fSumSchedClients	Total number of meetings that were successfully scheduled, specifically, the sum of these values: <u>fNumSchedWindows</u> , <u>fNumSchedMac</u> , <u>fNumSchedNotes</u> , <u>fNumSchedVUI</u> , and <u>fNumSchedWeb</u> .	Up to 16 numeric integers
