

**Main page:** [Cisco Unified MeetingPlace, Release 7.1](#)

**Up one level:** [Planning Your Deployment](#)

Licenses enable specific features and capabilities on the system. You purchase license SKUs with your Cisco Unified MeetingPlace order and install the license file for that order to enable the features and capabilities that you purchased. You may also upgrade your system by purchasing and installing additional licenses.

Use the information in this section to determine if you need to purchase and install additional licenses.

**Note:** Meetings that use Cisco WebEx do not use Cisco Unified MeetingPlace web licenses.

## Limitations for Cisco Unified MeetingPlace Licenses

- You cannot install more video licenses than voice licenses.
- You can install more licenses than your hardware can support; that is, you can manually override the system capacity. This is for your convenience when upgrading your system, so that you can upgrade the number of licenses before you physically upgrade your hardware. However, every time you restart the system with this configuration, the system will generate an alarm.

To avoid generating an alarm, change the values for the Override System Capacity parameters on the Meeting Configuration page in the Administration Center so that the licensed capacity matches the physical capacity. The system will use the values you enter when calculating the capacity for scheduling. Correctly configuring these values will also prevent inadvertent meeting extension failures caused by mismatches between licensed and actual resource values.

- Node must be active to add licenses.

## License Expiration

- By default, every Cisco Unified MeetingPlace system comes with six trial voice licenses, six trial web licenses, and six trial video licenses. If you do not purchase additional licenses, the six trial web licenses expire after 60 days.
- All licenses used for customer demonstration purposes expire.

- The system does not consider the expiration date of a license when users *schedule* meetings; instead, the system checks and enforces the expiration date when users *join* meetings.

## License Descriptions

Table: Licenses for Cisco Unified MeetingPlace Release 7.1 describes the available licenses for Cisco Unified MeetingPlace Release 7.1.

Table: Licenses for Cisco Unified MeetingPlace Release 7.1

| License                      | Description  | Type    |
|------------------------------|--|---------|
| <b>Conferencing Licenses</b> |  |         |
| videoconf                    | <p>The videoconf license limits the number of concurrent video participants in meetings. The available number of video ports may be further limited by the <u>maxvideo</u> license.</p> <p>If you do <i>not</i> install the videoconf license, the system can use only the six trial video ports for meetings. (A port is defined as a single video caller connecting at any rate.)</p>  | counted |
| voiceconf                    | <p>The voiceconf license limits the number of concurrent voice participants in meetings, including:</p> <ul style="list-style-type: none"> <li>• Calls to and from the system</li> <li>• Voice participants in meetings</li> </ul> <p>The available number of voice ports may be further limited by the <u>maxvoice</u> license.</p> <p>If you do <i>not</i> install the voiceconf license, the system can use only the six trial voice ports for premium (scheduled) meetings.</p>  | counted |
| webconf                      | <p>The webconf license limits the number of concurrent participants using the full web meeting room. This number may be further limited by the <u>maxweb</u> license.</p> <p><b>Note:</b> If you want all or most users to be able to schedule full web meetings, install an equal number of voice ports and web ports through the <u>voiceconf</u> and webconf licenses.</p> <p>If you do <i>not</i> install the webconf license, the system can use only the six trial web ports, which expire 60 days after system installation. If you purchase a base software SKU, your order comes with a trial webconf license that makes the six trial web ports permanent after you install the license.</p> | counted |
| <b>Maximum Licenses</b>      |  |         |
| maxvideo                     | <p>The maxvideo license denotes the maximum number of video licenses that can be used for meetings on this particular system. If the <u>videoconf</u> license count exceeds the value of the maxvideo license, the system uses the value of the maxvideo license instead.</p>  | counted |

|                                    |   |         |
|------------------------------------|---|---------|
|                                    | <p>The system displays any maxvideo license limitations in the Comment field on the Licenses Summary page.</p> <p>Restriction: If you purchase and install a new maxvideo license, it overwrites the old one. The new port count is not added to the previous port count.</p>   |         |
| maxvoice                           | <p>The maxvoice license denotes the maximum number of voice licenses that can be used for meetings on this particular system. If the <u>voiceconf</u> license count exceeds the value of the maxvoice license, the system uses the value of the maxvoice license instead.</p> <p>The system displays any maxvoice license limitations in the Comment field on the Licenses Summary page.</p> <p>Restriction: If you purchase and install a new maxvoice license, it overwrites the old one. The new port count is not added to the previous port count.</p> | counted |
| maxweb                             | <p>The maxweb license denotes the maximum number of web ports that can be used for meetings on this particular system. If the <u>webconf</u> license count exceeds the value of the maxweb license, the system uses the value of the maxweb license instead.</p> <p>The system displays any maxweb license limitations in the Comment field on the Licenses Summary page.</p> <p>Restriction: If you purchase and install a new maxweb license, it overwrites the old one. The new port count is not added to the previous port count.</p>                  | counted |
| <b>Additional Feature Licenses</b> |   |         |
| languages                          | <p>The languages license enables the simultaneous use of up to four supported languages on a system. If you do <i>not</i> install the languages license, you can enable only one language.</p>  | on/off  |
| videorecording                     | <p>The videorecording license allows you to video record meetings. When turned on, it allows the system to video record up to 100 meetings at a time.</p> <p>If you do <i>not</i> install the videorecording license, you cannot video record meetings.</p>   | on/off  |
| <b>Integration Licenses</b>        |   |         |
| jabber                             | <p>The jabber license enables you to integrate your Cisco Unified MeetingPlace system with Jabber.</p> <p>If you do <i>not</i> install the jabber license, you cannot integrate Cisco Unified MeetingPlace with Jabber.</p>   | on/off  |
| lotusnotes                         | <p>The lotusnotes license enables you to integrate your Cisco Unified MeetingPlace system with IBM Lotus Notes.</p> <p>If you do <i>not</i> install the lotusnotes license, you cannot integrate Cisco Unified MeetingPlace with IBM Lotus Notes.</p>   | on/off  |
| msft_int                           |   | on/off  |

Table: Licenses for Cisco Unified MeetingPlace Release 7.1

## Cisco\_Unified\_MeetingPlace,\_Release\_7.1\_--\_About\_Licenses

The msft\_int license enables you to integrate your Cisco Unified MeetingPlace system with Microsoft Outlook and Microsoft Office Communicator. You may activate this license from the Cisco Unified MeetingPlace Administration Center. For more information, see the "Integrating with Microsoft Outlook" module in the *Cisco Unified MeetingPlace 7.1 Integration Guide* at [http://www.cisco.com/en/US/products/sw/ps5664/ps5669/prod\\_installation\\_guides\\_list.html](http://www.cisco.com/en/US/products/sw/ps5664/ps5669/prod_installation_guides_list.html).

If you do *not* install the msft\_int license, you cannot integrate Cisco Unified MeetingPlace with Microsoft Outlook and Microsoft Office Communicator.
