  - ◆ [2.1 Restrictions](#)
  - ◆ [2.2 Procedure](#)

## Uninstalling the Web Conferencing Software

### Procedure

1. Choose **Settings > Control Panel > Add/Remove Programs** from the Windows Start menu.
2. Click **Cisco Unified MeetingPlace Web Conferencing** from the Add/Remove Programs window.
3. Click **Change/Remove**.
4. Click **Yes** when prompted to completely remove Web Conferencing and all its components.
5. Manually delete the storage locations for converted audio files (for example, drive:\wma\_files) from Windows Explorer.

## Uninstalling SQL Server

If you are no longer using SQL Server for any other applications, you can uninstall it manually.

### Restrictions

- Do not uninstall the local SQL Server if you are using remote SQL Server 2005. If, however, you are using remote SQL Server 2000, then you may choose to uninstall the SQL Server software and delete the MPWEB SQL database files from the Cisco Unified MeetingPlace Web Server.
- Uninstalling SQL Server does not remove the Cisco Unified MeetingPlace Web Conferencing SQL database files. To completely remove all database files associated with Cisco Unified MeetingPlace Web Conferencing, you must manually locate and delete the files.

### Procedure

1. Choose **Settings > Control Panel > Administrative Tools > Services** from the Windows Start menu.

2. Stop the **Microsoft SQL Server** service.
3. Choose **Settings > Control Panel > Add/Remove Programs** from the Start menu.
4. Select **Microsoft SQL Server**.
5. Click **Remove**.
6. Reboot the server.
