

Main page: [Cisco Unified MeetingPlace, Release 7.1](#)

Navigation: [Integration](#) > [Integrating with Microsoft Office Communicator](#)

Microsoft Office Communicator clients that worked with Cisco Unified MeetingPlace Release 7.0.2 or 7.0.3 will also work with Cisco Unified MeetingPlace Release 7.1.

However, you must reinstall the Cisco Unified MeetingPlace LCS Gateway because it must be installed after you have installed the Cisco Unified MeetingPlace Release 7.1 Web Server.
